

These are the folders you have to make before you download the Video Files you want.

First make this FOLDER on the drive like the Local Disk (C:) you want it on, in a FOLDER called: "ENTIRE BIBLE" Folder.

ADD this "2-New Testament" Folder in your "ENTIRE BIBLE" main Folder. Now ADD the Folder called "1-Old Testament".

Then make all of these 22 Folders below in only the "2-New Testament" Folder.

Then make or add the 34 Folders inside listed below for the Old Testament in the "1-Old Testament" folder.

So the easiest way to do this is to first make the 3 folders above.

First you single right click on the DRIVE like -Local Disk (c:)-, then you single right click on c: then you single left click "Show more options", then you put your pointer on the "New" until the "Folder" on the right pops up, then you left click on the "Folder" image and you either type in the names below or you can cut and paste them from below and above.

So to do this as easy as possible you first select and copy for example just the above ENTIRE BIBLE then you go to the Local Disk (C:), then you single right click on c: then you single left click "Show more options", then you put your pointer on the "New" until the "Folder" on the right pops up, then you left click on the "Folder" image and then you go to your NEW FOLDER and right click one time in the box where you type in the FOLDER name, and then select paste, and then hit enter. You just keep doing this until you are infact done with all of the files below.
